INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP00/06292

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, pages:

1-21 as originally filed

Claims, No.:

1-19 as originally filed

Drawings, sheets:

1/6-6/6 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/06292

☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes:	Claims	2-4,11-18
	No:	Claims	1,5-10,19
Inventive step (IS)	Yes:	Claims	
	No:	Claims	1-19
Industrial applicability (IA)	Yes:	Claims	1-19
	No:	Claims	

2. Citations and explanations
see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:
see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:
see separate sheet

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. The passage in the description page 3, paragraph 3 and the examples of table 5 imply that the "substantially simultaneous" addition of the two polymer solutions to the suspension defined in the claims also comprises a sequential addition, i.e. first the dilute solution followed by a separate addition of the second polymer solution. A sequential addition of two aqueous polymer solutions having different polymer concentrations (i.e. one can be regarded as a dilute and the other as a concentrated polymer solution, in accordance with the description page 4, third paragraph) to aqueous suspension to be dewatered is known from WO 95 33697 A (ALLIED COLLOIDS) (cf claims and page 14, lines 18-25). Therefore, if the above mentioned statement in the description is used to interpret the claims, the process of claims 1, 5-10 and 19 is anticipated by D1.
2. The dependent claims do not appear to contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of inventive step.

Re Item VII

Certain defects in the international application

On page 16 it is stated that the results of table 14 are shown on figure 4. Figure 4 seems however to illustrate (at least partially) the results of table 5. The point of the curve of the sequential dosing at polymer dose 10 mg/l, which according to table 5 is 331 (ml), is however in Fig. 4 under 330.

Re Item VIII

Certain observations on the international application

A "sequential dosing" as described on table 5 contradicts at least verbally the "simultaneous" addition of the two polymer solution defined in the claims. This inconsistency between the claims and the description leads to doubt concerning the matter for which protection is sought, thereby rendering the claims unclear.
